CLASSIFIED ADS

IN MEMORIAM
In loving memory of Mrs. P. O. Paulette, who died one year ago, May 22, 1954.

She always learned to watch for us,
Anxious if we were late,
In winter by the window,
In summer by the gate.

And though we mocked her tenderly,
Who had such foolish care,
The long way home would seem more safe
Because she waited there.

Her thoughts were all so full of us,
She never could forget;
And so I think that where she is
She must be watching yet.

Waiting till we come home to her,
Anxious if we are late....
Watching from Heaven's window,
Leaning from Heaven's gate.
—Children.

Dr. C. F. James On Reunion Committee

Williamsburg, Va. — The oldest living alumni of the nation's second oldest college will return to the College of William and Mary in Virginia next month for a special reunion.

A three-day reunion of all alumni and faculty members of the Lyon G. Tyler era is scheduled to coincide with the College's annual commencement exercises, it has been announced by James S. Kelly, William and Mary alumni secretary.

Tyler was the 18th president of William and Mary. He served as president of the historic College from 1888 until 1919 when he was succeeded by Dr. J. A. C. Chandler, father of the present William and Mary president.

It was during Tyler's administration that two of the most significant steps in William and Mary's long history were taken.

In 1906, it became a state institution and its control was placed under a Board of Visitors appointed by the Governor of Virginia.

Then, in 1918, one year before Dr. Chandler assumed the presidency William and Mary became co-educational.

Kelly said that the reunion is scheduled for June 10 through June 12. William and Mary's annual Alumni Day will be held on Saturday, June 11, and Commencement Day will be Sunday, June 12. Gen. Carlos P. Romulo, former president of the UN General Assembly, will deliver the commencement address.

Kelly said that a committee of 41 members of the Tyler era has been appointed to promote the reunion.

"It's a bit too early to say just how many 'Tyler Alumni' will be on hand for the reunion," he said, "but judging from the initial response it looks like we'll have quite a large turnout."

Among those named to the 41-member committee is Dr. Charles F. James of Appomattox

Nutrition Important Before Calving Date

German scientists report that the nutrition of a cow during the last 60 to 90 days before calving will affect these four things: the ease of calving and recovery afterwards, the quality of colustrum milk, production record on next lactation, and regularity of later breeding.

'Slow Down and Live' is Motto For Highway Safety Program

Richmond, Va.- Governor Stanley of Virginia has joined with the governors of 47 other states, the Commonwealth of Puerto Rico and the Commissioners of the District of Columbia to declare Memorial Day through Labor Day, 1955, as the period for a "Slow Down and Live" highway safety camapign.

The objective of this nationwide program is to reduce death, injury, and porperty loss on the streets and highways of the nation during the peak of summer travel.

The "Slow Down and Live" program, sponsored by the National Conference of State Safety Coordinators, was introduced in 1953 In 1954, it was expanded to include 24 states from Maine to Texas, and aided materially in providing the first wholesale reduction in traffic deaths reported by any group of states since World War II. In the 24-state area a total of 601 lives were saved with noteworthy decreases in personal injury and in property damage crashes.

Captain R. B. King, State Police Safety Officer, who is serving as Virginia's State Safety Co-ordinator, pointed out that 9,511 people were killed in the nation's traffic last year between Memorial Day and Labor Day and with the prediction that 50 million Americans will travel to vacation destinations by motor vehicle this year, he said, "We have a tremendous challenge to reduce the death and injury toll in summer driving."

"Slow Down and Live" concentrates on violations associated with speed—those typical of the driver who is perpetually "in a hurry" and throws caution and courtesy to the winds. According to Captain King, "Slow Down and Live" is not an enforcement measure but aimed at securing voluntary compliance of the motoring public in drastically reducing speed, speed too fast for conditions, improper passing, following too closely and failure to yield right-of-way which constitute the major causes of accidents.

Captain King said that the campaign is being conducted in cooperation with the Virginia Safety Council and the Virginia Department of Highways.

Governor Stanley has issued a proclamation urging all citizens to participate in the campaign and to observe the slogan "Slow Down and Live" during the period.

Governor Stanley's proclamation points out that the campaign is designed to reduce the number of traffic deaths which have been increasing at an alarming rate in recent years.

The 1954 fatality record for Virginia covering the period from 6:00 P. M. Friday, May 28 to midnight Monday September 6 was 198 highway deaths, which was a substantial reduction from the 249 experienced during the same period of 1953.

PREVENTION OF MILK FEVER STUDIED

It may be possible to prevent milk fever by feeding a low calcium —high phosphorus ration during the month or so before a dairy cow calves, says Jim Smith, County Agent.

Dr. W. A. Hardison, dairy researcher, reporting on a study undertaken at VPI Agricultural Experiment Station, says to date 10 animals with histories of previous attacks of milk fever have been fed a ration consisting of equal parts of a grain mixture (containing shelled corn, wheat bran and a phosphorus supplement) and oat hay. Blood samples for calcium and phosphorus analysis were taken at designated times. None of these animals developed clinical symptoms of milk fever at calving, and the blood levels of calcium and phosphorus of all the animals were within the normal range.

Similar work at a California Experiment Station has indicated that a practical way to prevent milk fever is to feed a ration with a calcium - phosphorus ration of about one to four for about one month before calving.
